OUTPUTS

FIRE BEHAVIOR

GENERAL:

Fire growth during the first 3 burning periods was heavily influenced by numerous spot fires with wind driven influences pushing fire downhill at critical rates of spread. The past two operational periods have seen minimal amounts of heat as isolated heavy down fuels continue to smolder.

Fire behavior for any new starts in both the Grass and Shrub models should remain within direct attack parameters with slow rates of spread. The P(i)G is at 92%, which is significant as any free burning fires will spot at which time the aforementioned rates of spread can dramatically increase.

Predicted Services has NOPS as "moderate" for large fire potential with no expected high risk criteria.

The predicted thunderstorms will be confined to the eastern and northern Mtns, these will be on the dry side with a slight mix of moisture, however the number of strikes will remain below the high risk category.

Fuel moistures for the 100 and 1000 hour fuels continue to be at or near the 97 percentile.

ERC levels have leveled and should trend down slightly.

These levels are still above the average and can spike with a slight variation in the weather.

All areas of the fire are in mop up and secure mode. This area has a history of heat sources lying dormant for multiple operational periods only to re-kindle causing a major redeployment of resources. Crews need to be cautious and watch for post fire environment hazards.

Throughout the State trees and large shrub groups are in a drought weakened state due to the multi-year drought, heavy limbs and bases are falling without notice. Footing stability will be poor due to suppression treated area and heavy ground traffic.

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy [here](#).

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

MAIL SERVICE – The Information Section can assist you with sending and receiving mail.

DEMOBILIZATION MESSAGE

Clayton Incident

CA-LNU-007582

Demobilization is in full swing. We appreciate your efforts during this incident and want to make sure that we get you to your next destination safely and efficiently. A Tentative Demobilization List is posted in several places around base camp, including the briefing area, the eating area, and at Fritch Hall where the Demobilization Unit is located. If you are on this list, please adhere to the following:

SHOW UP AT THE DESIGNATED TIME

- Show up at the designate time.
- Do not show up early.
- Do not show up late.

A demobilization schedule has been prepared in careful coordination with all essential demobilization functions. Not following the demobilization schedule can have significant negative impacts on the Demobilization Unit staff and all other resources scheduled for demobilization. We do not want you or any other resources to have unnecessary delays. Please adhere to your scheduled demobilization time.

BE PREPARED FOR A RE-ASSIGNMENT

There are other incidents in the State in need of resources. There is a strong possibility that many of the resources released from this incident will be immediately assigned to another one. Please make sure you are properly supplied, rested, and nourished while waiting for your designated demobilization time.

BE THOROUGH AND EFFICIENT

Please follow the instructions given to you when starting the demobilization process. Returning to the Demobilization Unit with a complete and accurate Demobilization Check-Out (ICS-221) form will help prevent any unnecessary delays. Unforeseen delays can occur during the demobilization process, such as mechanical issues discovered during Ground Support. Plan to visit the Time Unit towards the end of the demobilization process in order to provide an accurate accounting of your time.
